Technical Skills

JavaScript	React Native
Ruby	Flutter
SQL	Node.js
HTML/CSS	Ruby on Rails
Dart	Git
Python	Firebase
	API Design
	Database Design

Education

Bloc
2017 - 2018
Apprenticeship
Full-Stack Web Development

Riverside Community College
2014 - 2016
CIS/CSC Courses
Software Engineering with C++

Volunteering

Computer Science Tutor

Helped professors with tutoring their students on computer science topics during and after class time.

- Computer Information
- C++

Hacktoberfest

Open Source Contributor 2019
Participated in Digital Ocean's 2019 Hacktoberfest event where I placed in the top 50,000 open source contributors.

Experience

C3 Buisness Solutions

Software Developer

Santa Ana, CA

Dec. 2018 to Current

- Oracle Consultant for many different clients on a variety of projects using SQL, JavaScript, Node, Python, and Oracle's APEX.
- Developed a client facing Cloud Data-Loader with Python and JavaScript designed to parse and upload high-volume ERP data into a variety of Oracle cloud databases with a 600% performance increase over the previous methods.
- Designed and contributed to the development of a client facing cloud portal built with React and Node.
- Engineered and maintained C3's personalized Applicant Tracking System with JavaScript, Oracle SQL, and Oracle's APEX.

PeerRate

Front End Developer

Riverside, CA

Oct. 2017 to Dec. 2018

- Designed and Developed the web-foundations by applying AngularJS and Firebase to provide a responsive single page application.
- Contributed to the initial development of the Android application by utilizing Java with Android Studio.
- Implemented JavaScript, HTML5, and CSS3 to architect a modern UI/UX.

Exercism.io

JavaScript & Ruby Mentor

Remote

June 2018 to Dec. 2018

- Mentor aspiring software engineers through algorithmic coding challenges to introduce new ideas and techniques for providing stronger programming practices with cleaner and optimized code.
- Helped over 35 students with over 46 solutions in both JavaScript and Ruby.

Projects

Lùcio

Oct. 2019 to Current

Node.js, PostgreSQL, and React Native.

Lùcio is a cloud pet tag service ran on any IOS/Android mobile device. By inserting a customized NFC chip into the pet's collar, any mobile device can then scan and read the tag to view all the pet's data and contact info. The app provides a thorough summery of every pet, and provides users with the ability to contact other pet owners directly through the service itself without displaying any private information.

Steam RPG Bot

Oct. 2017 to Dec. 2018

Node.js

A Steam Ai for moderating community group chat rooms that allows for more than just moderation, such as an MMO Text adventure experience.

Mark it Off

Nov. 2017 to Dec. 2017

Ruby on Rails, and PostgreSQL

Mark it Off is a platform to organize your to-do lists by forcing you to complete each task within seven days of creation.
